### [The future of MacHamRadio.com](#)

Popular website may close due to conflict of interest with employer.

[MacHamRadio.com](#)

### [ARRL tells FCC to restore balance of modes on 80 and 75 Meters](#)

Refarming 3600 to 3650 kHz for data modes could prove to be a disincentive to General licensees to upgrade.

[ARRL](#)

### [Digital voice adapters for Raspberry Pi and Arduino](#)

This is an ongoing project to develop very inexpensive hardware and software to help amateur radio folks with D-Star.

[KI6ZUM](#)

### [RF exposure – Evaluating your station](#)

How do you practically conduct an RF exposure evaluation of your station?

[Ham Radio School](#)

### [TLF: A Linux based Ham Radio contest logger](#)

TLF is a curses based console mode general logging and contest program for Amateur Radio.

[TLF](#)

### [APEX, New APRS Protocol, New Paradigm, New Software](#)

APEX stands for "APrs EXtended"; It will be a new protocol which expands on and fixes most of the issues in the older APRS protocol while still remaining backwards compatible.

## **Nanocounter: Frequency Counter with an Android UI**

The Nanocounter is an accurate, open source frequency counter that uses an Android phone as its display.

[Hack A Day](#)

## **Why you should get your Extra Class license**

The Amateur Extra Class license is the highest class of license in the United States, and perhaps the world. Many hams—even hams that live outside the U.S.—aspire to pass the test and be awarded one.

### **Power outage... Zero HF noise**

During a power failure I thought I would see how quiet HF can be.

[Michael Carey](#)

### **Power is back... And so is HF noise**

The obsession with everyone (me included) to surround themselves with crappy, poorly designed electronics creates a nightmare for urban HF radio operators.

[Michael Carey](#)

## **and finally...**

### **Don't do this**

Power line short circuit.
